

School Website Management Made Easy!

We will create your school a website which is Affordable,

Fun & Easy to update!

Save time and money in updating your online presence, with a custom website content management system. The software can enable the content creators in your school to update the site themselves with no technical familiarity and in a straightforward, intuitive manner.

Manage Content, Not Technology. Cost-Effective Implementation.

Low Start-Up Programming & Licensing Fee

Great ease of use ensures wide-spread reception and reduced education expenses
Module-based method ensures swift scalability
Continuous software upgrades ensures exploitation of the newest, secure technology
Scrupulously tested, user-friendly software means nominal support
Elevated grade of typical functionality eradicates or diminishes reliance on outside contractors (agencies)
Your investment is therefore protected regardless of the growth of your school.
Enhanced results through integration of all components of the website.

Tried-and-tested components can be added effortlessly and you can integrate the system to other school critical systems and databases

A complete solution

Our CMS makes it exceptionally effortless to employ a management method for a school's online presence, extranet and intranet, as well as for a broad choice of associated roles.
